

Datadot Technology SA (PTY) Ltd, a manufacturer of microdots is committed to continual improvement of the Environmental Management System and the prevention of pollution:

We are committed to

- Continued training and awareness by all employees of the significant environmental aspects relating to the organization scope.
- Keep our environmental objectives and targets dynamic for continual improvement.
- Preserve our Earth by conserving natural resources.

The company commits to document, implement and continually improve as well as review the Environmental Management System periodically.

We commit to comply with the relevant environmental legislation, regulations and with other requirements to which the organization subscribes which relates to our environmental aspects.

This Environmental System Policy forms part of Datadot's company policies which are communicated to all employees and third parties working on behalf of the company on the George HQ site. The policy is communicated during the induction phase as well as a copy is kept in each department.

This Environmental policy is displayed to the public on our website
